Dear Prof. Schinzel

On behalf of the editors of NRC medical journal (www.mjnrc.com), I would have the pleasure to invite you to join the International Advisory Board of the journal in the domains of cytogenetics and clinical genetics. The Egyptian Medical Journal of the National Research Center is a semiannual medical journal in English presenting original research and reports of clinical practice in all fields of medicine including basic medical sciences. It is the official publication of the Medical Research Division of the National Research Center "NRC" of Egypt and the first issue appeared on December 2002. The journal has a broad scope encompassing both clinical and basic science topics of medicine in health and diseases. It makes timely publication of original research, case reports and review articles. It is an international peer reviewed journal. I do believe that your presence amongst the peer reviewers of our journal would add much to its scientific caliber.

With my very best wishes and sincere regards,

Deputy Editor

Prof. Dr. Ashraf Shaalan
Head of Medical Research Division

MJNRC

EGYPTIAN MEDICAL JOURNAL
OF THE
NATIONAL RESEARCH CENTRE

Semiannual Peer - Reviewed Journal

THIS ISSUE THEMES

GENETICS

- Preliminary report on genetic amniocentesis: single operator experience
- Bladder cancer: a cytogenetic and fluorescent in situ hybridization study
- Holoprosencephaly spectrum in Egyptian patients: clinico-radiological and genetic aspects

OBSTETRICS & GYNECOLOGY

- Reproductive performance of women with uterine septum after hysteroscopic metroplasty versus no surgical treatment and their infant neurodevelopmental outcome
- Histopathological study of midtubal occlusion

CHILD HEALTH & PEDIATRICS

- Bone mineralization of normal Egyptian children
- Antithrombin-III in pediatric systemic lupus erythematosus

DENTISTRY

- Study of effect of argon laser on dental composite and resin-modified glass ionomer cement by FT-IR spectroscopy
