Neuron-specific Functions of $\alpha 3$ Subunit Containing GABA_A Receptors

**Dissertation
zur
Erlangung der naturwissenschaftlichen Doktorwürde
(Dr. sc. nat.)
vorgelegt der
Mathematisch-naturwissenschaftlichen Fakultät
der
Universität Zürich
von
Carolin Julia Straub
aus
Deutschland**

Promotionskomitee

**Prof. Dr. Jean-Marc Fritschy (Vorsitz)
Prof. Dr. Uwe Rudolph (Leitung der Dissertation)
Prof. Dr. Isabelle Mansuy**

Zürich, 2009

1. Table of Contents

1. Table of Contents.....	3
2. Synopsis.....	5
3. Zusammenfassung.....	7
4. Introduction	9
4.1. γ -Aminobutyric acid (GABA).....	9
4.2. The GABA _A receptor.....	11
4.3. GABA _A receptor functions	12
4.3.1. Studies with GABA _A receptor knockout mice.....	13
4.3.2. Studies with GABA _A receptor point-mutant mice.....	18
4.3.2.1 Studies with mice carrying a diazepam-insensitive point-mutation.....	18
4.3.2.1 Studies with mice carrying a point-mutation insensitive to general anesthetics ...	20
4.4. α 3 subunit containing GABA _A receptors.....	21
4.4.1. Localization of α 3 subunit containing GABA _A receptors	21
4.4.2. Effects of RNA editing of the α 3 subunit.....	23
4.4.3. Phenotype of mice lacking the α 3 subunit of the GABA _A receptor	24
4.4.4. Studies with mice carrying a diazepam-insensitive α 3 subunit of the GABA _A receptor.....	25
4.4.5. Studies using compounds selectively modulating α 3 subunit containing GABA _A receptors.....	26
4.4.6. GABRA3 gene and association with affective disorders.....	27
4.5. Catecholaminergic systems.....	28
4.5.1. Dopamine.....	29
4.5.2. Noradrenaline	31
4.5.3. GABAergic modulation of catecholaminergic systems	32
5. Aims	36
6. Results	38
6.1. Neuron-specific rescue of the α 3 subunit of the GABA _A receptor in dopaminergic and noradrenergic neurons	38

6.2. Assessment of depressive-like behavior in mice lacking the $\alpha 3$ subunit of the GABA _A receptor and in mice expressing the $\alpha 3$ subunit selectively in dopaminergic or noradrenergic neurons.....	49
6.3. $\alpha 3$ subunit containing GABA _A receptors in reward-related behavior	64
6.3.1. Cocaine-induced place preference is unaltered in C57BL/6J mice lacking the $\alpha 3$ subunit of the GABA _A receptor.....	64
6.3.2. Diazepam and cocaine potentiate brain stimulation reward in C57BL/6J mice	72
6.3.3. ICSS behavior in mice lacking the $\alpha 3$ subunit of the GABA _A receptor: Addendum to Chapter 6.3.2. "Diazepam and cocaine potentiate brain stimulation reward in C57BL/6J mice"	81
6.4. Substance-specific alterations of the effects of intravenous general anesthetics in mice lacking the $\alpha 3$ subunit of the GABA _A receptor	83
7. Overall Discussion	99
7.1. Studying behavior in genetically modified mice: General considerations.....	100
7.2. GABA _A receptors in depression.....	106
7.3. GABA _A receptors in reward	108
7.4. GABA _A receptors in anesthesia.....	111
7.5. Future directions.....	114
8. References.....	116
9. Appendices	134
9.1. Acknowledgements	134
9.2. Abbreviations.....	136
9.3. Curriculum vitae.....	137
9.4. Publication: Immunofluorescence in brain sections: simultaneous detection of presynaptic and postsynaptic proteins in identified neurons	139
