Except for the purposes of private study, research, criticism or review no part of this
book may be reproduced, stored in a retrieval system or transmitted, in any form
or by any means, without the written permission of the publisher.

Important Note: Medical knowledge is ever-changing. As new research and clinical experience broaden our knowledge, changes in treatment and drug therapy may be required. The authors of the material herein have consulted sources believed to be reliable in their efforts to provide information that is complete and in accordance with standards accepted at the time of publication. However, in view of the possibility of human error by the authors or publisher of the work herein, or changes in medical knowledge, neither the authors nor the publisher, nor any other party who has been involved in the preparation of this work, warrants that the information contained herein is in every respect accurate or complete, and they are not responsible for any errors or omissions or for the results obtained by the use of such information. Readers are advised to check the product information sheet included in the package of each drug they plan to administer, to be certain that the information contained in this publication is accurate and that changes have not been made in the recommended dose or in the contraindications for administration.

Some of the product names, patents and registered designs referred to in this book are in fact registered trademarks or proprietary names even though specific reference to this fact is not always made in the text. Therefore, the appearance of a name without designation as proprietary is not to be construed as a representation by the publisher that it is in the public domain.
