## Dear Author,

Here is a proof of your article for publication in The Journal of Asian Studies. Please print out the file and check the proofs carefully, make any corrections necessary on a hardcopy, and answer queries on the e proofs.

You may choose one of the following options for returning your proofs.

If the corrections can be explained clearly in a text message, please list the corrections in an email, citing page number, paragraph number, and line number. Send the corrections as soon as possible (no later than 48 hour after receipt) to the Production Editor, Kim Daly at this email address: << [KDaly@cambridge.org](mailto:KDaly@cambridge.org) >>

Please cc the Managing Editor, Jenniefer Munger, at [jas@journalofasianstudies.org](mailto:jas@journalofasianstudies.org)

You can also email an annotated PDF, along with the copyright transfer form, to the Production Editor at the email address provided above. Alternatively, a hardcopy proof can be faxed together with the copyright transfer form to 212-337-5959, Attn: Kim Daly.

Please also send the **original signed copyright transfer form** by express mail to: The Production Editor, Kim Daly, Cambridge University Press, 32 Avenue of the Americas, New York, NY, USA 10013.

To order reprints or offprints of your article or a printed copy of the issue, please visit the Cambridge University Reprint Order Center online at: [www.sheridan.com/cup/eoc](http://www.sheridan.com/cup/eoc)

You are responsible for correcting your proofs. Errors not found may appear in the published journal.

The proof is sent to you for correction of typographical errors only. Revision of the substance of the text is not permitted, unless discussed with the editor of the journal.

Please answer carefully any queries raised from the typesetter.

A new copy of a figure must be provided if correction of anything other than a typographical error introduced by the typesetter is required - please provide this in eps or tiff format to the production editor and print it out to send with the faxed proof.

Thank you in advance.

# Author Queries

*Journal:* JAS (The Journal of Asian Studies)

*Manuscript:* JAS\_72\_2\_Japan Book Review

- Q1** Please check that all names have been spelled correctly and appear in the correct order. Please also check that all initials are present. Please check that the author surnames (family name) have been correctly identified by a pink background. If this is incorrect, please identify the full surname of the relevant authors. Occasionally, the distinction between surnames and forenames can be ambiguous, and this is to ensure that the authors' full surnames and forenames are tagged correctly, for accurate indexing online. Please also check all author affiliations.

# Journal transfer of copyright

Please read the notes overleaf and then complete, sign, and return this form to **Journals Production, Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013** as soon as possible. Please complete both **Sections A and B**.

## The Journal of Asian Studies

In consideration of the publication in **The Journal of Asian Studies**

of the contribution entitled: .....

by (all authors' names): .....

### Section A – Assignment of Copyright (fill in either part 1 or 2 or 3)

#### 1 To be filled in if copyright belongs to you

##### Transfer of copyright

I/we hereby assign to Association for Asian Studies full copyright in all forms and media in the said contribution, including in any supplementary materials that I/we may author in support of the online version.

I/we hereby assert my/our moral rights in accordance with the UK Copyright Designs and Patents Act (1988).

Signed (tick one)

the sole author(s)

one author authorised to execute this transfer on behalf of all the authors of the above article

Name (block letters) .....

Institution/Company .....

Signature: ..... Date: .....

*(Additional authors should provide this information on a separate sheet.)*

#### 2 To be filled in if copyright does not belong to you

a Name and address of copyright holder .....

b The copyright holder hereby grants to Association for Asian Studies the non-exclusive right to publish the contribution in the Journal including any supplementary materials that support the online version and to deal with requests from third parties.

(Signature of copyright holder or authorised agent) .....

#### 3 US Government exemption

I/we certify that the paper above was written in the course of employment by the United States Government so that no copyright exists.

Signature: ..... Name (Block letters): .....

### Section B – Warranty and disclosure of conflict of interest (to be completed by all authors)

I/we warrant that I am/we are the sole owner or co-owners of the contribution and have full power to make this agreement, and that the contribution contains nothing that is in any way an infringement of any existing copyright or licence, or duty of confidentiality, or duty to respect privacy, or any other right of any person or party whatsoever and contains nothing libellous or unlawful; and that all statements purporting to be facts are true and that any recipe, formula, instruction or equivalent published in the Journal will not, if followed accurately, cause any injury or damage to the user.

I/we further warrant that permission for all appropriate uses has been obtained from the copyright holder for any material not in my/our copyright including any audio and video material, that the appropriate acknowledgement has been made to the original source, and that in the case of audio or video material appropriate releases have been obtained from persons whose voices or likenesses are represented therein. I/we attach copies of all permission and release correspondence.

I indemnify and keep Cambridge University Press and Association for Asian Studies indemnified against any loss, injury or damage (including any legal costs and disbursements paid by them to compromise or settle any claim) occasioned to them in consequence of any breach of these warranties.

Name (block letters) .....

Signature ..... Date .....

*(one author authorised to execute this warranty statement above and conflict of interest statement below on behalf of all the authors of the above article)*

Please disclose any potential **conflict of interest** pertaining to your contribution or the Journal; or write 'NONE' to indicate you declare no such conflict of interest exists. A conflict of interest might exist if you have a competing interest (real or apparent) that could be considered or viewed as exerting an undue influence on you or your contribution. Examples could include financial, institutional or collaborative relationships. The Journal's editor(s) shall contact you if any disclosed conflict of interest may affect publication of your contribution in the Journal.

Potential conflict of interest .....

## Notes for contributors

1 The Journal's policy is to acquire copyright in all contributions. There are two reasons for this:

(a) ownership of copyright by one central organisation tends to ensure maximum international protection against unauthorised use; (b) it also ensures that requests by third parties to reprint or reproduce a contribution, or part of it, are handled efficiently and in accordance with a general policy that is sensitive both to any relevant changes in international copyright legislation and to the general desirability of encouraging the dissemination of knowledge.

2 Two 'moral rights' were conferred on authors by the UK Copyright Act in 1988. In the UK an author's 'right of paternity', the right to be properly credited whenever the work is published (or performed or broadcast), requires that this right is asserted in writing.

3 Notwithstanding the assignment of copyright in their contribution, all contributors retain the following **non-transferable** rights:

- The right (subject to appropriate permission having been cleared for any third-party material) to post *either* their own version of their contribution as submitted to the journal (prior to revision arising from peer review and prior to editorial input by Cambridge University Press) *or* their own final version of their contribution as accepted for publication (subsequent to revision arising from peer review but still prior to editorial input by Cambridge University Press) on their **personal or departmental web page**, or in the **Institutional Repository** of the institution in which they worked at the time the paper was first submitted, or (for appropriate journals) in PubMedCentral or UK PubMedCentral, provided the posting is accompanied by a prominent statement that the paper has been accepted for publication and will appear in a revised form, subsequent to peer review and/or editorial input by Cambridge University Press, in **The Journal of Asian Studies**, published by Cambridge University Press, together with a copyright notice in the name of the copyright holder (Cambridge University Press or the sponsoring Society, as appropriate). On publication the full bibliographical details of the paper (volume: issue number (date), page numbers) must be inserted after the journal title, along with a link to the Cambridge website address for the journal. Inclusion of this version of the paper in Institutional Repositories outside of the institution in which the contributor worked at the time the paper was first submitted will be subject to the additional permission of Cambridge University Press (not to be unreasonably withheld).

- The right (subject to appropriate permission having been cleared for any third-party material) to post the definitive version of the contribution as published at Cambridge Journals Online (in PDF or HTML form) on their **personal or departmental web page**, no sooner than upon its appearance at Cambridge Journals Online, subject to file availability and provided the posting includes a prominent statement of the full bibliographical details, a copyright notice in the name of the copyright holder (Cambridge University Press or the sponsoring Society, as appropriate), and a link to the online edition of the journal at Cambridge Journals Online.

- The right (subject to appropriate permission having been cleared for any third-party material) to post the definitive version of the contribution as published at Cambridge Journals Online (in PDF or HTML form) in the **Institutional Repository** of the institution in which they worked at the time the paper was first submitted, or (for appropriate journals) in PubMedCentral or UK PubMedCentral, no sooner than **one year** after first publication of the paper in the journal, subject to file availability and provided the posting includes a prominent statement of the full bibliographical details, a copyright notice in the name of the copyright holder (Cambridge University Press or the sponsoring Society, as appropriate), and a link to the online edition of the journal at Cambridge Journals Online. Inclusion of this definitive version after one year in Institutional Repositories outside of the institution in which the contributor worked at the time the paper was first submitted will be subject to the additional permission of Cambridge University Press (not to be unreasonably withheld).

- The right to post an abstract of the contribution (for appropriate journals) on the Social Science Research Network (SSRN), provided the abstract is accompanied by a prominent statement that the full contribution appears in **The Journal of Asian Studies**, published by Cambridge University Press, together with full bibliographical details, a copyright notice in the name of the journal's copyright holder (Cambridge University Press or the sponsoring Society, as appropriate), and a link to the online edition of the journal at Cambridge Journals Online.

- The right to make hard copies of the contribution or an adapted version for their own purposes, including the right to make multiple copies for course use by their students, provided no sale is involved.

- The right to reproduce the paper or an adapted version of it in any volume of which they are editor or author. Permission will automatically be given to the publisher of such a volume, subject to normal acknowledgement.

4 Cambridge University Press co-operates in various licensing schemes that allow material to be photocopied within agreed restraints (e.g. the CCC in the USA and the CLA in the UK). Any proceeds received from such licenses, together with any proceeds from sales of subsidiary rights in the Journal, directly support its continuing publication.

5 It is understood that in some cases copyright will be held by the contributor's employer. If so, Cambridge University Press requires non-exclusive permission to deal with requests from third parties.

6 Permission to include material not in your copyright

If your contribution includes textual or illustrative material not in your copyright and not covered by fair use / fair dealing, permission must be obtained from the relevant copyright owner (usually the publisher or via the publisher) for the non-exclusive right to reproduce the material worldwide in all forms and media, including electronic publication. The relevant permission correspondence should be attached to this form.

7 Cambridge University Press shall provide the first named author with offprints or/ and a final PDF file of their article.

If you are in doubt about whether or not permission is required, please consult the Permissions Controller, Cambridge University Press, 32 Avenue of the Americas, New York, New York 10013-2473 USA  
Email: manderson@cambridge.org.

The information provided on this form will be held in perpetuity for record purposes. The name(s) and address(es) of the author(s) of the contribution may be reproduced in the journal and provided to print and online indexing and abstracting services and bibliographic databases

*Please make a duplicate of this form for your own records*

## JAPAN

*Queer Japanese: Gender and Sexual Identities through Linguistic Practices.* By HIDEKO ABE. New York: Palgrave Macmillan, 2010. x, 199 pp. \$85.00 (cloth). doi:10.1017/S0021911813000272

*Queer Japanese* is a treasure trove of information about the language practices—and language attitudes—of sexual minority speakers of Japanese, an understudied group of speakers, who are critically important to a realistic understanding of the gendered qualities of Japanese, a language that is typically bracketed off in cross-linguistic research as “unique” in having “separate languages” for (heterosexual, heteronormatively aligned) women and men. As with many treasure troves, the reader will find in this volume an untold wealth of information and much food for thought.

Abe centers her investigation of linguistic practice and performance by Japanese sexual minorities around three key questions: *Why* do queer speakers (the author’s term) make use of certain linguistic categories, and when? *What* do they hope to accomplish? And *how* do these linguistic forms relate to gender, sexual, and social identities? She stresses gender and gender identities as being fluid, and language as an equally fluid resource through which identities are negotiated. She reminds us that choices of which linguistic resources to deploy are at once macro-socially compelled and micro-interactionally negotiated, a point brought home to us repeatedly in subsequent chapters.

Chapter 1 draws data from advice columns in four gay and lesbian magazines; the focus here is less on the language forms used than on the range of advice offered, showing that advice offered focused on tactical possibilities for resolving problems rather than challenging the dominant heteronormative framework.

We get to language specifics in chapter 2, which focuses on lesbian bar talk. The speech practices outlined in this chapter center around lesbians’ search for appropriate first- and second-person pronouns and sentence final forms for use in the bar setting. Pronominal forms and sentence final forms are components of the heteronormatively construed packages of gendered “women’s language” and “men’s language,” so it is hardly surprisingly to find them problematized in the lesbian bar setting. Abe finds that there is both inter- and intra-speaker variation in the pronominal choices and sentence final form choices made in these bars as “lesbians negotiate constraints such as ‘feminine’ or ‘masculine’ attached to linguistic features with the insertion of novel meanings and usages” (p. 51). Much, much more work is needed on lesbian speaking practice, but Abe offers us a tantalizing glimpse. As to the particular language forms that are problematized in the lesbian bar scene, we will encounter the negotiated uses of these form sets again in subsequent chapters, so for readers unfamiliar with Japanese, a chart outlining the most stereotypically gendered forms would have been helpful.

## 2 The Journal of Asian Studies

47 The next three chapters deal with the speech of gay men (among whom are included  
48 a small number of transgender/transsexual speakers). Chapter 3 examines transcripts of  
49 published *zadankai* “round table discussions” with *danshō*, male cross-dressing sex  
50 workers in post-WWII Tokyo. Abe introduces some of the features of *onēkotoba*,  
51 which Abe glosses as “queen’s speech”—a speech style that is associated with performing  
52 “gayness” in, for example, gay bars, and media representations of gays—here. High-  
53 lighted features are first- and second-person pronouns (p. 62), the frequent use of (fem-  
54 inine) sentence final particles, the use of set phrases associated with feminine speech  
55 (e.g., *iya*, *komatchau*), and the use of feminine interjections (e.g., *ara*) (p. 70). Chapter  
56 4 focuses on the contemporary performance of *onēkotoba* on stage. Abe analyzes the  
57 2002 two-character play *Chigau Taiko* (Different drums) as it was scripted by gay writer  
58 and bar owner Ōtsuka Takashi versus as it was performed by Ōtsuka and a friend. This  
59 chapter reiterates the central roles that pronouns, sentence final particles, and a handful  
60 of interjections play in its definition. It also shows, by pointing out the muting of the  
61 highly stereotyped feminine forms in the course of performance, how difficult this reg-  
62 ister is to sustain in practice, a point that I hope the author will pursue in future work.  
63 Chapter 4 takes on the issue of *onēkotoba* outside the arena of overt performance to  
64 address five claims made by Abe’s gay consultants: (1) *onēkotoba* is a product of bar  
65 culture; (2) gay men hate *onēkotoba*; (3) *onēkotoba* is a manipulation of women’s speech,  
66 not an imitation; (4) *onēkotoba* necessarily involves *dokuzetsu* “sharp tongue” (or  
67 “prickly”) speech; and (5) *onēkotoba* is a parody of women’s speech. The opinions of her  
68 consultants are quite varied, which is likely a good characterization of the status of *onēko-*  
*toba* in the gay community today. Chapter 6 sums up the findings of the previous chapters.

Throughout, this book refers to so many diverse aspects of the Japanese language  
69 that it may be hard for non-Japanese-speaking readers to appreciate some of the  
70 points made. For those of us who come to this volume with some expertise in Japanese,  
71 however, it is a book to which we will return again and again for its wealth of information  
72 and its enticing look at a world of “gendered” Japanese that has yet to be fully explored.

79 *Intimate Distance: Andean Music in Japan*. By MICHELLE BIGENHO. Durham,  
80 N.C.: Duke University Press, 2012. xii, 248 pp. \$79.95 (cloth); \$22.95 (paper).  
81 doi:10.1017/S0021911813000284  
82

83 Michelle Bigenho’s ambitious and valuable new book represents a welcome contri-  
84 bution on many fronts. Not only does this work introduce a little-known world of  
85 Japanese enthusiasts of Andean “folklore” music, but it also reevaluates conceptual  
86 dichotomies in popular cultural studies (e.g., appropriation versus appreciation) and post-  
87 colonial studies (e.g., domination versus resistance). Drawing on interviews with Japanese  
88 fans, and with Japanese and Bolivian performers of the music, as well as participant obser-  
89 vation as a performing member of a traveling Andean music group, Bigenho’s insightful  
90 and sensitive portrayal of a small but vibrant music scene in Japan that has garnered little  
91 scholarly attention uncovers a surprising trans-Pacific connection.

92 Outlining the theoretical tools employed to make sense of this connection, Bigenho  
proposes “intimate distance” as a key idea, defined as “the pull of desire toward

93 difference and the contrasting distance that one still maintains while taking on the cul-  
 94 tural trappings of an Other” (p. 2). The fans and performers of Andean music frequently  
 95 refer to the imagined shared ancestry between Japanese and indigenous Bolivians, as the  
 96 same “Mongols,” to explain Japanese love of the music. Bigenho argues that this racia-  
 97 lized discourse of intimacy is a product of Japanese and Bolivian nationalist discourses,  
 98 through which “non-Western Others are getting together and imagining the otherness  
 99 of the Other whom they see as not so other from themselves” (p. 22).

100 Chapters 2 and 3 locate Andean music in the global music market and discuss how  
 101 Bolivian musicians work within this. Andean music garnered worldwide popularity after  
 102 the release of Simon and Garfunkel’s “El Condor Pasa” (1972), a song allegedly inspired  
 103 by a tune Paul Simon heard in the Peruvian countryside. Japanese audiences, many of  
 104 whom first encountered Andean music through “El Condor Pasa,” continue to expect  
 105 an exoticized indigeneity from the performers. The touring Bolivian musicians them-  
 106 selves, most of whom are mestizos, feel straightjacketed by the expectation and unable  
 107 to express their artistry, even if they also proudly claim indigeneity as part of their Bolivian  
 108 national heritage.

109 Chapter 4 shifts focus to Japanese fans and performers of the music. Bigenho por-  
 110 trays the Japanese fandom that goes beyond being passive consumption; many become  
 111 enthusiastic hobbyists and professional performers, taking classes, participating in work-  
 112 shops, and even traveling to live in Bolivia. Why this devotion to the Andean indigenous  
 113 music? Bigenho’s Japanese interviewees frequently express their disdain for the Western  
 114 or Western-influenced Japanese commercial music scene, and convey a vague feeling of  
 115 longing that Bolivian music evokes for them. Therefore, Bigenho theorizes, Andean  
 116 music for these Japanese “develops its nostalgia from an external exotic . . . located in  
 117 a past” (p. 115).

118 Chapter 5 tackles the racialized narratives of intimacy expressed by Japanese and  
 119 Bolivians, who point to their shared instrument types (e.g., Japanese *shakuhachi* and  
 120 Andean *quena*), pentatonic scale, and even physical characteristics, languages (Japanese  
 121 and Quechua), and bodily habits (e.g., sleeping on the floor). Bigenho contextualizes  
 122 these within Bolivian and Japanese nationalisms. While Bolivia’s nationalist projects,  
 123 such as *mesizaje* (race mixing) and multiculturalism, placed the “management of racially  
 124 inscribed indigeneity” (p. 138) at its center, modern Japan’s nationalism emerged as a  
 125 racial project of building a “yellow” empire, vis-à-vis “white” Western powers, encompass-  
 126 ing diverse Asian peoples. Both nationalisms are, Bigenho argues, “motivated by a  
 127 common desire to distinguish self-other relations that fall outside the ongoing implicit  
 128 location of many such positionings relative to the United States” (p. 147).

129 In chapter 7, Bigenho addresses her positionality during fieldwork, as a white Ameri-  
 130 can, or *gringa*, anthropologist trained as Latin Americanist touring among Japanese and  
 131 Bolivian musicians. During the research she often felt alienated from her Japanese and  
 132 Bolivian companions, whose “narratives worked along an East-West axis and implicitly  
 133 placed [her], the gringa who plays Bolivian music, on the other side, with the West. Imag-  
 134 ined indigeneity afforded the Bolivians and Japanese common access to a category of the  
 135 non-West” (p. 157). In defending her lack of linguistic and intellectual expertise in Japa-  
 136 nese studies to write this book, Bigenho argues that the surprising and unsettling situ-  
 137 ations she faced helped shape her research “precisely at the intersections of these  
 138 unequal preparations” (p. 151). Her concluding chapter emphasizes the two main argu-  
 ments: the centrality of the idea of race in nationalism and transnationalism, and intimacy  
 as a potent theoretical tool for addressing social inequality in global popular cultural  
 studies and postcolonial studies. For all of this, she has abundant ethnographic evidence  
 and has presented it skillfully.

139 While it is hard to find criticism for a well-researched and well-written book, Bigen-  
 140 ho's attempt to explain the Japanese-Bolivian connection could be enhanced. Although  
 141 Bolivian and Japanese nationalisms may provide an important ideological backdrop,  
 142 other, perhaps less ideological, factors, such as Japanese masses' long fascination with  
 143 archaeology in general and the Andean civilization and Inca empire in particular, along  
 144 with the history of Japanese foreign aid to Bolivia and resulting Japanese presence  
 145 there, as well as Japanese society's voracious adoption of "foreign" popular cultures gen-  
 146 erally, could contextualize the transnational nexus in a more grounded manner. Bigen-  
 147 ho need not defend her position as a Latin Americanist researching in Japan, since the classic  
 148 ideal of complete immersion in an ethnographic "field" is nowadays largely recognized as  
 149 illusory anyway; she could have, however, explored a wider range of Japanese-language  
 150 sources on Japanese affection for Bolivian folk culture and Bolivians' acceptance of Japa-  
 151 nese fans and performers. In this regard, her Latin Americanist background might indeed  
 152 have limited her research. This minor quibble aside, Bigenho's engaging ethnography is a  
 153 valuable resource on popular culture and (trans)nationalism in Japan, and it offers a  
 154 welcome departure from the tired West versus East dichotomy that has long dominated  
 theories of cultural globalization.

TAKU SUZUKI Q1

Denison University  
 suzukit@denison.edu

161 *Tokyo Cyberpunk: Posthumanism in Japanese Visual Culture.* By STEVEN T.  
 162 BROWN. New York: Palgrave Macmillan, 2010. ix, 256 pp. \$95.00 (cloth);  
 163 \$28.00 (paper).  
 164 doi:10.1017/S0021911813000296

166 In *Tokyo Cyberpunk*, Steven Brown analyzes feature-length and serial anime and  
 167 live-action films that engage with unsettling questions about what it means to be (post)  
 168 human in a time and place not so distant from the present. Brown and the works upon  
 169 which he directs his primary focus render everyday human experiences uncannily as  
 170 they address questions of subjectivity, agency, and the possibility of resistance in hyper-  
 171 connected worlds populated by robots, gynoids, ghosts, cyborgs, and disembodied  
 172 humans running amok.

173 Drawing on the philosophy of Gilles Deleuze and Félix Guattari, Brown reads these  
 174 texts "rhizomatically." That is, rather than offering a linear, hierarchical narrative analysis,  
 175 Brown views these films and anime "tangentially through their rhizomatic connections  
 176 with other anime, other films, other works of art, and other discursive formations"  
 177 (p. 9). This approach seems particularly apt for many of the complicated works of Japa-  
 178 nese film and anime engaging with the troubling implications of posthumanism. In the  
 179 introduction, Brown offers Ōtomo Katsuhiro's highly complex and influential feature-  
 180 length cyberpunk anime *Akira* (1988; based on a manga serialized in 1982–90) as one  
 181 such example. *Akira*, he writes, "encourages rhizomatic reading by evoking the processes  
 182 of nonhierarchical connections" through "diverse smaller narratives, codes, and memes,  
 183 offering a horizontal image of thought where anything may be linked to anything else  
 184 without requiring vertical notions of a metanarrative" (p. 9), an ascription that can be  
 applied, more or less, to the five other works of anime and live-action film Brown goes

185 on to explore. The result of his rhizomatic reading is a delightful excursion full of twists  
 186 and turns, some inevitable, some surprising.

187 The book is divided into three parts, each centered around one or two Japanese  
 188 works. In the first—and, to me, the richest—part, Brown peels apart layers of visual,  
 189 aural, and narrative complexity in Oshii Mamoru’s highly intertextual feature-length  
 190 anime *Ghost in the Shell II: Innocence* (2004). In *Innocence*, Oshii contemplates how  
 191 humans might relate to the various *ningyō*—“dolls, puppets, automata, androids, and  
 192 cyborgs” (p. 13)—that increasingly populate the world. *Innocence* is richly citational,  
 193 drawing on religious (the Buddha, Confucius, the Bible), literary (Milton, Zeami), scien-  
 194 tific (Richard Dawkins), and other texts. Some of this citation is visual, including Japanese  
 195 automata and a disturbingly erotic series of photographs of dolls created by German sur-  
 196 realist Hans Bellmer in the 1930s. The latter inspired the murderous gynoids at the heart  
 of the narrative.

197 Part 2 focuses on Tsukamoto Shin’ya’s live-action film *Tetsuo: The Iron Man* (1989),  
 198 which Brown reads in the context of Fritz Lang’s *Metropolis* (1927), David Cronenberg’s  
 199 *The Fly* (1986), and the tentacle-ridden erotic horror anime *Urotsukidōji: Legend of the*  
 200 *Overfiend* (1987), among other works. Brown parses the film to show how Tsukamoto  
 201 “deconstructs the essentializing identification of masculinity with phallic dominance  
 202 and violence” (p. 56) in a text that explores the eroticization of male cyborgs/androids  
 203 and loss of identity.

204 In part 3, Brown looks at Kurosawa Kiyoshi’s *Kairo* (2001; released in English as  
 205 *Pulse*) and Oshii Mamoru’s *Avalon* (2001), two live-action films that reflect on the impli-  
 206 cations of being haunted by “electronic presence,” that is, the “liveness” (p. 112) of com-  
 207 munication technology from telegraphs to cyberspace to virtual reality. Kurosawa’s horror  
 208 film meditates on social withdrawal (*hikikomori*) and the dehumanizing implications of  
 209 technology through parallel narratives wherein ghosts are increasingly populating the  
 210 world and a virus is spreading over the Internet, infecting individuals with the desire  
 211 to withdraw from society and then to kill themselves. Shot in Poland, Oshii’s *Avalon*  
 212 engages with issues of authoritarian surveillance and oppression, virtual reality, disaf-  
 213 fected youth, and individual agency, “offer[ing] an implicit critique of the society of  
 214 the spectacle by showing the isolation and alienation produced by the totalitarianism  
 of spectatorship” (p. 140).

215 Finally, in the conclusion Brown uses Nakamura Ryūtarō’s thirteen-part anime series  
 216 *Serial Experiments Lain* (1999) to revisit and rethink through the issues of posthumanism  
 217 considered in the preceding chapters. Nakamura’s series carries with the tension between  
 218 embodiment in the real world and disembodiment in the “Wired” and a simultaneous  
 219 desire for both. Lain’s ultimate realization “that her everyday life includes aspects that  
 220 are both embodied *and* virtual” (p. 183) opens up space for resistance.

221 In sum, Brown has deftly—and rhizomatically—woven together films and anime by  
 222 Oshii Mamoru, Ōtomo Katsuhiro, Kurosawa Kiyoshi, Nakamura Ryūtarō, and Tsukamoto  
 223 Shin’ya with major and obscure works of European, American, and Japanese cinema and  
 224 anime; iconic photography and other graphic art; and film and literary criticism and  
 225 theory. Given the vastness of this textual and theoretical archive, however, it is surprising  
 226 that so few of the critical and theoretical texts upon which Brown draws come from Japan  
 227 itself. While “posthumanism is profoundly transnational” and there is, thus, “no Japanese  
 228 posthumanism per se,” as Brown points out, it does “come to be inflected in certain ways  
 229 by the cultural forms and practices specific to Japanese visual culture of the late twentieth  
 230 and early twenty-first centuries” (p. 159). It seems a shame, then, that Brown engages so  
 briefly with the fertile body of criticism and theory written from the context of Japan.  
 Nevertheless, in his own critical and genealogical examination of these works of film

and anime, Brown makes a highly important contribution to Japanese visual studies as a whole. The result is an enjoyable and eminently readable text, which, in spite of Brown's extensive engagement with critical and cultural theory, is written in language accessible to undergraduate students. It will be very much at home in Japanese studies courses focused on film, anime, and popular culture, as well as film and cultural studies courses focused on science fiction, technology, and posthumanism.

*The Demimonde in Japanese Literature: Sexuality and the Literary Karyūkai.*

By CYNTHIA GRALLA. Amherst, N.Y.: Cambria Press, 2010. 300 pp. \$114.99 (cloth).

doi:10.1017/S0021911813000302

Starting in the seventeenth century, many major Japanese cities included spaces that catered to pleasure seekers, where a consumer could purchase sex and more significantly the fantasy of pleasure and beauty outside of the strictures of everyday life. Quarters dedicated to entertainment and erotic commerce, such as the Yoshiwara in Edo, were known not only to the customers who visited but more widely through vivid evocations in the visual arts, on the kabuki and bunraku stage, and in prose fiction. The pleasure quarter's proximity to theaters was no accident, for both existed on the fringes of proper society and offered engagement in stories apart from the quotidian. The pleasure quarter as an urban space persisted through the mid-twentieth century, though with an altered relationship to the city and society in the modern era. From the Meiji to the present, the notion of a demimonde has continued to draw in many artists and writers, such as Higuchi Ichiyō and Nagai Kafū. Cynthia Gralla's book *The Demimonde in Japanese Literature* explores artistic engagements with the Japanese demimonde in modern Japanese literature, film, photography, and dance. The book offers close readings of artists and thinkers as diverse as Kuki Shūzō and Murakami Ryū, as the author discovers shared themes of contested boundaries, liminality, eroticism, and aesthetics in their pursuit of this place or state of mind called the demimonde.

Through the twentieth century, the *karyūkai* (the Japanese term that Gralla uses to designate the areas of the city) was sometimes resonant with nostalgia for the aesthetic and social fantasy of the Tokugawa pleasure quarters, and, at others, regarded as a source of contamination to bourgeois and national values. Gralla is interested in the demimonde as "a peripheral space of concentrated, commodified, staged eroticism" but also features the people who "embody such a fringe erotic lifestyle" and embrace transgression (p. 11). Other aspects of the demimonde thus broadly understood are "a malleable temporality" that tends to the circular rather than the linear, and the shift away from an "actual space" to an "imaginative space," a space that "plays on a dialectic of otherness and containment" (pp. 7, 11). The author regards the cultural expressions related to these conceptions as part of the demimonde and its "subculture of resistance" (p. 12). This broad conception of the demimonde allows Gralla to include in her study everything from Nagai Kafū's nostalgic *Tamanoi* to the prostitutes working so vividly in burnt-out ruins of Tokyo in Tamura's *The Gate of Flesh*, and the closed world of a rundown geisha house in Kōda Aya's *Nagareru*. Other Japanese works that Gralla brings into the category of demimonde

277 include Tanizaki's *Naomi*, Murakami Ryū's *Almost Transparent Blue*, and his film *Topāzu*.  
 278 At points, she comments on the tension between performances and imagination of the  
 279 demimonde and the Japanese empire's odious practice of "comfort women."

280 Gralla proves herself a careful and astute reader and critique of works in a range of  
 281 media. To her credit, she includes a significant comparative component by reading Japa-  
 282 nese novels against European, American, Middle Eastern, and Chinese literary works.  
 283 The author also delves extensively into critical and theoretical stances on the demimonde,  
 284 eroticism, taboo and transgression, trauma (national and personal), nostalgia, the city, and  
 285 the figure of the *flâneur*.

286 One of the most interesting and original chapters is "Dancing the Interior Demi-  
 287 monde," which offers analysis of writer and controversial cultural figure Mishima  
 288 Yukio (and photographs of him by Hosoe Eikoh), and an especially intriguing reading  
 289 of *butoh* performer Ohno Kazuo as "demimondaine" (pp. 211–32). In her commentary  
 290 on Ohno's renowned work "Admiring La Argentina," the author clarifies her broad use  
 291 of the concept of the demimonde in terms of space, gender, and art, noting that Ohno  
 292 "dragged behind him, in his lace train, a theatrical space filled with the essence of mul-  
 293 tiple artistic and erotic subcultures" (p. 229). Also compelling are her reading of Mura-  
 294 kami Ryū's controversial novel *Almost Transparent Blue* (1976), in which drugs  
 295 "facilitate the creation of a personal demimonde of heightened physicality and imagin-  
 296 ation" (p. 171), and her careful analysis of space and interiority in Kōda Aya's novel *Nagar-  
 297 eru* (1955).

297 While much of Gralla's literary and cultural analysis is thought provoking and  
 298 thorough, some of the chapters suffer from repetition and would have benefited from  
 299 an editor's firm hand. One also wishes for greater engagement with the work of Japanese  
 300 scholars and theorists, beyond the easily accessible and translated work of premier critics  
 301 such as Isoda Kōichi and Maeda Ai.

302 *The Demimonde in Japanese Literature* will be of interest to students and scholars of  
 303 comparative literature and Japanese studies.

308 *Bonds of the Dead: Temples, Burial, and the Transformation of Contemporary*  
 309 *Japanese Buddhism*. By MARK ROWE. Chicago: University of Chicago Press,  
 310 2011. xv, 258 pp. \$91.00 (cloth); \$29.00 (paper).  
 311 doi:10.1017/S0021911813000314  
 312

313  
 314 Mark Rowe has provided us with a rich and insightful critical inquiry into one of the  
 315 most common assumptions about contemporary Japanese Buddhism, namely, that it is a  
 316 "funerary religion" and that this fact is inextricably tied to its long-standing decline. His  
 317 innovative analysis of recent to current developments is based upon almost a decade of  
 318 fieldwork and study pertaining to innovations in Buddhist and non-Buddhist funerary  
 319 "technology." He focuses on the "Eternal Memorial Grave," an innovative form of Bud-  
 320 dhist grave that is accessible to individuals independent of their family and parishioner  
 321 status, but he also addresses other alternatives to traditional funerals, such as the scatter-  
 322 ing of ashes and its main supporter, the "Grave-Free Promotion Society" (the object of a  
 recent study by Satsuki Kawano), thus providing for valuable contextualization. Notably,

his analysis also takes account of a broad range of materials, from interviews to pamphlets and academic reports.<sup>5</sup>

Rowe's analysis does not completely reverse the received view of Buddhism as a funerary religion. But throughout the book he convincingly presents Japanese Buddhism as a religion that is alive and currently struggling to renew itself, not least through the reinvention and renegotiation of its link to mortuary ritual. Although the ultimate success of this renovatory process cannot be predicted—and Rowe is very careful not to overstep the line from analysis to prophesy—he gives ample evidence that there is a willingness by Buddhist experts, from academic centers to local temples, to face the problems at hand and to come up with novel doctrinal and practical solutions. And these solutions are welcomed beyond the limits of those excluded from the benefits of traditional ancestor worship. In fact, Rowe also does much to shed light on the genealogy of the perceived contradiction between lofty doctrine and pedestrian popular custom, and to question this core tenet of the concept of “funerary Buddhism”—although this is one point deserving of further attention and analysis. His presentation of two sides of Buddhist institutions (local temples and academic centers) alongside with the perspectives of those making use of the innovative funerary solutions also provides rich material for reflection on the concomitant dichotomy between the “purely religious” and the “economical” side of Buddhist institutions.

This work consists of a vivid exposition of the problem, as well as the research objectives and methods, organized into an introduction and six main chapters. They elaborate on the history and interpretation of “funerary Buddhism” in Japan (chapter 1) and contemporary graves and the incentives and ideas behind innovative funeral technologies such as the Buddhist Eternal Memorial Grave (chapter 2). The book also features case studies of one rural Nichiren temple (chapter 3) and one metropolitan Rinzai Zen temple (chapter 4) that offer Eternal Memorial Graves in addition to the traditional parishioner grave, and discusses a nondenominational alternative initiative to replace graves with the scattering of ashes (chapter 5) and the role of Buddhist “sectarian” (Rowe's terminology) academic centers (chapter 6). The short conclusion presents something like a management summary of the study and its results. This section is highly recommended for the hurried reader but largely redundant for those who have read their way through the volume so far—which is made easy by Rowe's clear and multifaceted presentation of perspectives on a problem that is, after all, facing us all in one way or another.

On the whole, I was convinced by Rowe's argument that mortuary practices are an essential domain for investigations into the state of contemporary Japanese Buddhism, and that the innovations that were the main object of his study show the potential for a remodeling of the relationship between Buddhist temples and the laity. He presents ample material that elucidates not only the fact that Japanese Buddhism is “alive” and not necessarily dying, but also the mode of how it is “lived” in multiple negotiations of doctrine, custom, spirituality, and economy. I also fully subscribe to the programmatic connection he draws between doctrinal and ethnographical study (pp. 7–10). And I was particularly impressed by the both sympathetic and circumspect way in which Rowe presents this material—such as when he complements his report of the fact that the priest who invented the Eternal Memorial Grave at Tōchōji (the Tokyo Rinzai temple) wanted the money for a renovation of his temple to come from “religious activities” with a footnote that money so generated would then be exempt from tax (p. 125, n. 22), and on the next page reports how the involvement of a private company in the running of this temple's

<sup>5</sup>Satsuki Kawano, *Nature's Embrace: Japan's Aging Urbanites And New Death Rites* (Honolulu: University of Hawaii Press, 2010)

369 Eternal Memorial Grave has led one member of staff to “consider taking the tonsure” (p.  
 370 126)—thus showing in detail how the commercial-economical and spiritual elements may  
 371 interact in various, and not necessarily conflicting, ways.

372 Rowe touches an important point of the “grave problem” and the “grave-free solu-  
 373 tion” when he mentions the importance of the presence of physical objects immediately  
 374 connected to the deceased (not necessarily bodily remains, p. 119) to the functioning of a  
 375 memorial site (p. 172). And he demonstrates a subtle but important shift in Japanese per-  
 376 ceptions of the dead, away from the idea of pacification and moving towards images of the  
 377 dead being assured of a peaceful resting place (pp. 118–19). This seems to contrast with  
 378 another shift in the perception of cremated remains, namely that in distinction to earlier  
 379 periods, cremation seems no longer to function as a way to purify the remains and to draw  
 380 a secure line between the dead and the living—a fact Rowe reflects upon (pp. 176–77),  
 381 but does not put in historical perspective.

382 Two limitations in terms of the scope of his argument stem from his double focus on  
 383 innovation and on Buddhism as a religion: we do not learn much about the motivation of  
 384 the (dwindling?) majority that holds on, however tenaciously, to the traditional form of  
 385 the temple parishioner’s family grave (but there is a telling section on “parishioner reac-  
 386 tion” to Tōchōji’s Eternal Memorial Grave in chapter 4, pp. 132–36), and we learn next to  
 387 nothing about the perspective of what is, in Rowe’s own analysis, the biggest player in the  
 388 field, that is, the “funeral industry” (pp. 37–38). To request such additional inquiries may  
 389 be asking too much of an already rich and plural-perspective study. But Rowe’s insistence  
 390 on the significance of the innovations in Buddhist funeral technology he describes would  
 391 surely have warranted a more explicit reflection on the effects of their exclusion. In terms  
 392 of methodology, I think this study would have further profited from a more stringent  
 393 adherence to questions of status and other this-worldly benefits connected with funerals  
 394 that Rowe exposes in his historical review of “funerary Buddhism,” especially in the sub-  
 395 section on Meiji funeral procession (pp. 32–35). In reading this passage, I was half expect-  
 396 ing him to draw a connection to Bourdieu’s theory of distinction and symbolical capital,  
 397 which I think would have provided for a useful matrix for the interpretation of his infor-  
 398 mants’ perspectives. Finally, Rowe opens up a transnational comparative perspective in  
 399 his introduction that would definitively be worth pursuing, but he never comes back to  
 400 it in the later course of his analysis. All this is to say that I think Rowe’s book deserves  
 401 to be read and discussed widely by scholars and students of Japanese and comparative  
 402 religion, and that I hope to see it followed up by complementary studies.

 408 *Pilgrimages to the Ancient Temples in Nara: Koji junrei.* By WATSUJI TETSURŌ.  
 409 Translated by HIROSHI NARA. Portland, Maine: MerwinAsia, 2012. xxxv, 202  
 410 pp. \$35.00 (paper).  
 411 doi:10.1017/S0021911813000326

412  
 413  
 414 In May 1918, philosopher Watsuji Tetsurō (1889–1960) embarked on a tour of Nara’s  
 temples “to enjoy the power of ancient art, to cleanse my mind, and enrich it” (p. 10). By

then he had already obtained his degree in philosophy from Tokyo Imperial University (1912) and had developed a great interest in Japan's cultural history (p. xiv). The memoir of his journey, *Koji junrei*, appeared first in installments (1918) and then as a volume in 1919; Hiroshi Nara now brings us an English translation in an elegant book complemented by beautiful photographs that bring Watsuji's description to life.

Readers expecting a traditional travel diary, with entries on the weather, the food, and the mundane, will not recognize *Koji junrei* as such: the descriptions of train journeys and exhausted bodies, of potholes and annoying people, are few and far between. Less "travel diary" and more "museum catalog meets collection of scattered thoughts," *Koji junrei* is Watsuji's occasion to muse on the function of art, the relationship between past and present, and (as Nara suggests in his introduction), "the significance of Japanese culture in world history" (p. xxviii).

Art, to Watsuji, is a source of spiritual enlightenment. His chapters are peppered with allusions to the "ecstasy achieved through art" (p. 7) and to the "enrapturing experience[s]" (p. 51) and "otherworldly mood[s]" (p. 149) art engenders. When he uses art pieces as portals into the Nara period, Watsuji is at his narrative best; a skilled storyteller, he uses vivid imagery to offer a masterful depiction of the consecration ceremony for the Great Buddha (p. 78). Other times, however, he veers toward the technical and quickly turns pedantic—few readers, I suspect, will find his ruminations on "the rate at which the distance between pillars [at the Golden Hall of Tōshōdaiji] becomes narrower" (p. 98) especially riveting.

As a place in which antiquity and modernity coexist, the city of Nara prompts Watsuji to elaborate on the relationship between past and present. To be sure, there is more "past" than "present" in his jottings, but the two occasionally intersect—for example, with steam-engine trains crossing timeless landscapes (p. 77), or with the shiny halls and statues of old now covered in grime (p. 28). The collision of past and present yields to melancholy and triggers recollections of Watsuji's own childhood. On these occasions the reader catches a quick glimpse of Watsuji the man—a rare treat, for he usually remains distant and elusive, and lets the art take center stage.

In a site brimming with glimpses of Chinese and continental history, Watsuji also attempts to define Japan's place in the world—not so much from a geopolitical stance but from a cultural one. Readers familiar with the ideas of the mature Watsuji will find hardly any comment to warrant his later characterization as a "harbinger of *nihonjinron*" (p. xvii). In *Koji junrei*, the young Watsuji embraces Nara's cosmopolitanism and its adherence to the Chinese model, celebrates the fact that "Japanese creativity ... was actually borne out of foreign culture" (p. 110) and that the "many foreigners ... who participated very actively in the creation of [Nara] culture ... are our ancestors—both spiritually and physiologically" (p. 120). He also strives to find Greek roots for several manifestations of Japanese art, from *gigaku* (p. 64) to paintings (pp. 4–5). (In the introduction he penned in 1946 for a reprint, Watsuji confesses to being mildly embarrassed by some aspects of his book and admits he would now write something entirely different; pp. 1–2.)

Nara's introduction details the historical background of *Koji junrei* and sheds light onto Watsuji's philosophical trajectory. It also provides keys to interpret Watsuji's mindset at the time of the trip to Nara—for example, hinting at the tensions between East and West or at Watsuji's struggle in choosing between moral imperatives and the pleasures of life (pp. x–xii). While Nara effectively compares *Koji junrei* to Goethe's *Italian Journey* (something Watsuji does himself, p. 31), I would have liked to see Nara contextualize *Koji junrei* more widely against the Japanese tradition of travel literature. Sitting on my desk, for example, is Takamura Itsue's (1894–1964) *Musume*

461 *junreiki*.<sup>6</sup> We have here two journeys taken in the same year by two iconic figures of  
 462 Japan's interwar period, both of whom were writing "before they were famous," so to  
 463 speak, and for the purpose of being published. Yet, we also have two very different  
 464 ways to engage with the landscape and with the readers: Takamura can be amusingly self-  
 465 deprecating or annoyingly snobbish, yet she is always there, in the picture, within the  
 466 grasp of the readers; Watsuji, by contrast, tends to be humorless and distant, if not  
 467 altogether removed from the scene. To be clear, I am not saying that one work is  
 468 better than the other; rather, I would suggest reading the two in conjunction to get a  
 469 full grasp of the many opportunities for nostalgia, discovery, and self-introspection  
 470 travel (still) afforded in the Taishō era.
